DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 in part, drawn to compounds and compositions of formula I, wherein Y is a N, Q is a C, X is an O, W is CH, J is an alkyl, Ar is as given in claim 3 and all the R's are non-hetero ring containing, classified in class 546, subclass 268.1.
- II. Claims 1-14 in part, drawn to compounds and composition of formula I, wherein Y is a N, Q is N, X is O, W is CH, J is an alky, Ar 1 is as given in claim 3 and all other R's are non-hetero ring containing classified in class 546 and various subclasses.
- III. Claims 1-14 in part, drawn to compounds and pharmaceutical compositions of formula I wherein Y is a C, Q is C, X is O, W is N, J is an alkyl, Ar1 is as given in claim 3 and all other R's are non hetero ring containing, classified in class 544 and various subclasses.
- IV. Claims 1-14 in part, drawn to compounds and compositions wherein X, Y, Q, J, Ar1, W are different than those given in groups I-III, classified in various classes and subclasses. A further election of a single disclosed species is required. May be subject to further restriction.
- V. Claims 15-17, drawn to different methods of treating, classified in class 514 and various subclasses.

Art Unit: 1625

VI. Claim 18, drawn to a process of making, classified in class 546, 544 and various subclasses.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the compounds have a different core and hence different bonding and properties. They are patentable independent and distinct.

Inventions I-IV and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method of treating diseases requiring anticoagulant can be treated by other anticoagulants.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. Thus the search is burdensome.

Art Unit: 1625

A telephone call was made to Mr. Anthony Bottino on 3/30 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

If applicant 's traverse on the grounds that the inventions are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the groups to be obvious variants or clearly admit on the record that this is the case. In either instance if the examiner finds one of the inventions unpatentable over the prior art , the evidence or admission may be used in a rejection under 35 USC 103 of the other invention.

Applicants preserve their right on the cancelled non-elected subject matter, without prejudice in due course.

If applicants elect one of the compound claims group and if it is found to be allowable ONE method of treating will be rejoined limited to the same scope as the allowaed claims, provided it is free from other 112 issues.
